Lumen® Solutions for Managed UC&C – Customer Help Guide

Managed SBC Services for Teams, Webex, Zoom and other 3rd party calling

December 2023

Purpose

The purpose of this guide is to provide customers with information on how to report incidents or outages to Lumen for the Managed UC&C Cloud services, including the Managed SBC environment, sessions and registration of devices, advanced Reporting and Analytics and Number Management. This also includes how to open a change request for Tenant Management (MACDs).

Prerequisites

Most ticketing must be done via the phone. However customers can open tickets using Lumen Control Center (www.lumen.com/login) which is also used for Lumen® Voice Complete® services (Signing in to Control Center).

Note

When communicating with Support please refer to your service as "Microsoft Teams" for any Teams related services (Direct Routing, Tenant Management, etc.).

Refer to your service as "Managed SBC" to cover any non-Teams services to 3rd party calling platform integrations (i.e. SBC as a Service (SBCaaS), Cloud Sessions).

|	
If you are experiencing a widespread issue or outage and wish to call Lumen to open a ticket. If you believe your issue is related to your voice services with Managed UC&C, please specify "MS Team" or "Managed SBC" per the above note.	Call Lumen North American UCC Repair team: 877-393-0014 or +1 (303) 260- 4918
Be prepared to answer these questions and provide the noted information for the support technician.	For authentication, please provide your billing account number (BAN) and company name associated with this service. • Audio or application issue? • Are you able to reproduce the issue? • Has this issue occurred previously? • If so, when did this issue occur previously? • Did this issue only affect a single user? • Date/time of the issue • What is the version of the application that you used? • Telephone number being called • Telephone number called from • Email address of the user that had the issue • Site user is based out of • Detailed description of the issue • Steps to recreate the issue

Managed UC&C Cloud service level agreements

Incident service restoration

Time to restore will be measured from the time customer opens a trouble ticket with Lumen until the affected services are restored. Lumen will respond to incidents with an acknowledgement to customer within 30 minutes from the time the trouble ticket is opened and restore services within the following schedule:

Severity	Restore
Priority level 1	4 hours
Priority level 2	8 hours
Priority level 3	20 working hours
Priority level 4	40 working hours

The severity level of each incident will be determined by Lumen based upon the following criteria:

Severity	Incident examples
Priority level 1: critical business disruption	A critical incident is occurring, and all users within the customer organization are unable to use the Managed SBC service. OR There is a total loss of any of the following across an entire customer organization or customer site; • Cloud-based SBCs on the HALO™ platform
Priority level 2: major business disruption	Major Incident is occurring, and the customer organization or customer site is experiencing the total loss of a key feature (e.g., advanced reporting & analytics or number management)
Priority level 3: minor business disruption	Minor incident is occurring, and the customer organization or customer site is experiencing; • Loss of a non-key feature of the service • Disruption to a key feature • Disruption to the cloud-based SBCs
Priority level 4: low business disruption	There is a loss or disruption to any of the services that is impacting individual users.

Scheduled and emergency maintenance

Scheduled maintenance

Lumen will undertake planned maintenance to conduct upgrades, changes, patches, and general maintenance. Planned maintenance will occur at prescheduled times and communicated with notice.

Planned maintenance may impact and/or cause minimal disruption to the service. The maintenance times will be scheduled to cause the minimum possible inconvenience if a disruption of service were to occur.

Emergency maintenance

On occasion, Lumen must perform emergency maintenance which can potentially impact or disrupt service. This type of maintenance is usually carried out as part of the incident resolution process. Lumen will give potentially impacted customers as much notice as reasonably possible.
